

PORTABLE WHEEL WEIGHERS

We offer a wide range of portable vehicle weighing equipment for every vehicle from racing cars to the heaviest truck. The battery operated scales can be used in any location and set up in minutes to provide wheel, axle and total vehicle weight information so important for vehicle design test and the prevention of overloading.

PT300

PT300DW

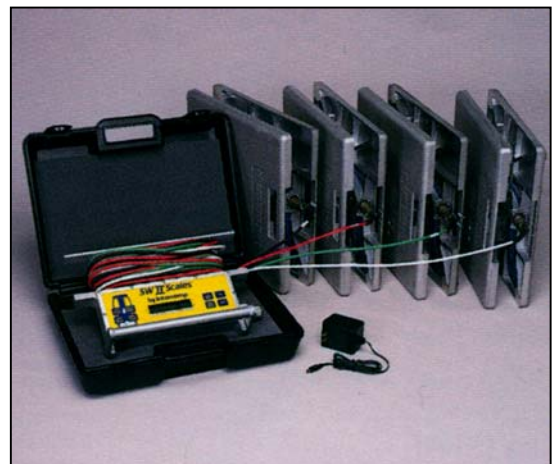

CHEKLODE PT300 scales have been awarded the NATO Stock Number 6670-01-3772569 confirming the product's high quality and ability to work accurately in all climatic and operational conditions.

Cheklode are now used for military and civil aircraft freight loading applications worldwide. They are completely self contained with their own integral weight display. They can be used singly, in pairs or in sets of up to 6 pads to weigh any product or vehicle up to 60,000 kgs.

- Over 200 PT300 systems destined for a UK military customer.

- Speedweigh car weighing and set-up diagnostics system.
